# 1) Problem Definition

## 1.1) Problem Abstraction

In the era of industry 4.0 developed rapidly. Information Technology (IT) has been changing the world quickly . Website system is growing in the world and increasingly playing an important role for people. Enterprises gradually use the commercial website to replace the old business form by its superiority from entertainment, marketing and trade. Business website has many advantages: faster, more convenient, more efficient, not limited in space and time, cost effective . Therefore Venus Handicrafts specializes in handicrafts that want to create a website to advertise and trade goods. This project can contribute to widely promoting the company, attracting customers, increasing revenue for the company.

## 1.2 ) The Current System

The current mode of operation is sell products at the company so that those who need to buy them will come to the store to see and buy . That causes many disadvantages for buyers and companies. Buyers will be hard to update the new goods, waste of time as possible on the days the company to pick g door. Can run out without knowing. May cause the company to lose customers and be less profitable.

## 1.3) The Proposed System

With the current way of operation requires that the company need a website to operate to improve the way it works and overcome the disadvantages.

- ❖ Name Website: Venus Handicrafts company.
- ❖ Form: Provide items of handicrafts, ornaments, accessories for customers who have needs .
- ❖ System function:
  - For system management:
    - Goods management.
    - Provide information about goods sold on the Website.
    - Quickly update new products.
    - Manage customer orders.
  - For customers:
    - Find goods quickly and conveniently.
    - You can contact quick answers.
    - Order quickly, conveniently, ensure quality, receive goods at the place.

### 1.3.1) Boundaries of the System

Customers can only pay by door-to-door payment after delivery, or to the place of payment. Customers can view goods without registration, but are required to register / login for purchases. Customers can only place orders to the location, name, and phone number registered at the member registration page.

### 1.3.2) Hardware and Software Requirements

- ❖ Hardware :
  - A minimum computer system will help you access all the tools in the courses is a Pentium 166 or better.
